

## **My School**

**My School has a unique history. Arsakeio, the school's name, came from Apostolos Arsakis, who endowed it. In the beginning it started being girls only. The schools were created in 1836 but in 1936 our school a new school was founded in Thessaloniki. Then, a while later, they started enrolling boys.**

**Our school is a three-story building, and it has 22 classrooms. It has a computer lab, a technology lab and a music/art classroom, the others are regular classrooms. There are about 300 students.**

**There are many after school programs for students to join like: Robotics, Basketball, Football etc.**

**Our school is great because the students love it, we have great teachers, and the environment is great. I love going to school because I can see my friends and enjoy the classes.**
